

Enterprise Membership Overview

Seeking to improve project measurement and control across your organization and get the most from your Microsoft license investment?

The MPUG® community can help. You've already invested in the tools to manage projects, you have the right strategy, methodology and people. Now give everyone on your project teams the training to leverage those investments. If the project data isn't input correctly, it can't be reported or measured correctly. We will help you drive your project teams' productivity with **Microsoft Project, SharePoint and Excel**.

How?

- Over 350 hours of on-demand training in addition to weekly live web trainings created and presented by industry experts
- Trainings range from project data entry and migration for general users to advanced scheduling, dashboards and reporting for professional project managers
- Expert instructors and contributors from across the globe
- Templates and how-to articles (500+) reduce time to productivity

Why MPUG?

- Productivity centered, project management training accessible to all team members for just pennies a day through MPUG volume licensing.
- Training eligible for PMI® PDUs across all three categories of the new PMI® talent triangle
- Easy user reporting and tracking via personalized transcripts and certificates of completion
- Content that is crowd vetted by 400k+ users giving you the most effective training and tips
- Your employee's emails are safe with us. We never spam, share or sell e-mail addresses
- Ten+ years as the official Microsoft Project industry association

Already have an enterprise project management training program?

We can support you. Our on-demand content and a pool of 300+ instructors can augment your internal training. Join these industry leaders using MPUG training to implement projects within the Microsoft toolset.

PLUS, groups get a direct line to MPUG for content and support.
