

Tim Runcie

President

Tim.Runcie@Advisicon.com

Professional Summary

Tim Runcie is one of only a few dozen industry recognized experts worldwide who focuses on project and portfolio management technology as a Microsoft Most Valuable Professional (MVP) in Project Server. Tim is the president of Advisicon Inc., an international consulting, application development and training services firm that helps organizations through process and methodology changes to get the most out of their project, program and portfolio management objectives that are directly tied to return on investment and corporate strategies.

Tim understands that successful project management adoption requires changes in organizational culture, paired with learning new skills and strategies. That is why he developed Advisicon's approach of Knowledge Transfer – Optimization – Sustained Results. Enabling organizations to create their own sustainable project management culture through consultative mentorship and guidance drives Tim's passion for sharing his expertise and teaching.
